

MY SECURITY SCORE

Very Good | 100

Our assessment process starts with an automatic recursive mapping of a company's digital presence, followed by non-intrusive detection and analysis of threats, access points, exploitations and misconfigurations. Finally, the security score is calculated by assessing the findings in the face of current threats, comparing them to security best practices and considering how well the company is managing its issues.

Issues Summary

	Total		
Certificate Authority Issues	1 → 0%	0 →	0 →
Email Security Issues	2 → 0%	0 →	0 →
Hijackable Subdomains	0 → 0%	0 →	0 →

Very High Severity High Severity

	Total		
Mail Servers in Blocklist	0 → 0%	0 →	0 →
Compromised Credentials	0 → 0%	0 →	0 →
Exposed Cloud Storage	0 → 0%	0 →	0 →
Exposed Web Interfaces	0 → 0%	0 →	0 →
Exploitable Ports	0 → 0%	0 →	0 →
TLS/SSL Issues	2 → 0%	0 →	0 →

Note: Please review the specific details per issue in your report for more tailored recommendations.
